### Message

Amidst these trying times due to the Covid-19 pandemic, I feel extremely happy to present the 'Provisional Coal Statistics 2020-2021' which puts on record the steady growth India has achieved in the Coal and Lignite sector. Even though the effect of the pandemic has been everywhere, the Coal and Lignite sector has shown its resilience reflecting the criticality of its contribution to the steady development of the Indian economy. The achievements over the years and the strength of this sector has left a mark on the world.

This was possible only because of the ideal leadership of our Hon'ble Prime Minister Sri Narendra Modi and the sincere efforts of everybody associated with this sector. The development in the sector is a stepping stone towards the 'Atmanirbhar Bharat' the clarion call given by the Hon'ble PM

I sincerely hope and believe that this publication will be of immense help. I thank all the officials of Ministry of Coal, especially the Coal Controller's Organization for making this publication a reality during this time.

Jai Hind!

New Delhi

## Message

Coal forms the backbone of India's energy system. It contributes to nearly 58% of the country's commercial primary energy supply (PES) and coal-based power forms more than 70% of power generated in the country. Due to its carbon emission intensity, a transition to clean energy is desirable which is 'just' and gradual. This calls for medium-term planning. Data will form the critical input for all stake-holders to address the challenges that will follow this transition. It has been a major demand of the think-tanks and corporates that coal-related data should be made available in the public domain in its entirety. This compilation substantially meets this demand.

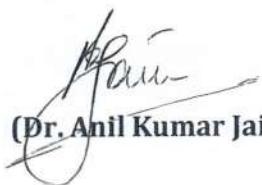

Coal Controller's Organization has been at the forefront of the efforts to help the Ministry of Coal, related Ministries, Government agencies, research bodies, planners, and thinkers, among others by facilitating easy access to a bewildering amount of statistical information on the primary energy source of India. The "Provisional Coal Statistics 2020-21", contains information on the coal and lignite sector of India for the past few years and the provisional information for the year 2020-21.

I acknowledge the effort of Ms Santosh, Deputy Director General (Statistics) and Acting Coal Controller, who led the team at the Coal Controller's Organization in bringing this to fruition. I also appreciate the contribution of different stakeholders for providing crucial data that helped in the finalization of this report. I hope the readers get a detailed overview and necessary insights from this comprehensive repository of information and this would be helpful for planning policy and research purposes.

Jai Hind!

## Message

The Ministry of Coal continues to concentrate on enhancing supplies from the Coal and Lignite sector of India and the 'Provisional Coal Statistics 2020-21' captures the same through figures and data and publishes it. I feel privileged to showcase these achievements through the publication of coal statistics.

The reforms of the sector, accelerated execution of various projects aimed at enhancing production while striving to ensure timely dispatches in a sustainable manner under the guidance of hon'ble Minister for Coal, Mines and Parliamentary Affairs Shri Pralhad Joshi and the stewardship of the Secretary of Coal, Dr. Anil Kumar Jain, has been a fascinating journey full of enthusiasm and commitment to performance. I feel privileged to have been a part of it. The entire world has been busy fighting the COVID-19 pandemic for the past year, but the tireless efforts of our Minister and officials have helped sustain the growth and performance of the Coal and Lignite sector.

I thank the Coal Controller's Organization in making this publication a reality. The 'Provisional Coal Statistics 2020-21' provides a reference guide in gauging the progress of the coal and Lignite sector of India showcasing the contribution that gives assurance to people in these difficult times brought by COVID-19 pandemic and the global economic slowdown. I am sure the coal sector producers, consumers and the coal dependent industries and businesses will find this publication useful in orienting their actions for the future and also feel encouraged to contribute significantly in the sector's development.

I congratulate the team CCO for publishing this compilation and extend good wishes to them with the fond hope of their scaling newer heights.

(Vinod Kumar Tiwari)

## Message

The Provisional Coal Statistics 2020-21 brings together all the crucial data related to Coal and Lignite sector in one volume. The publication contains a comprehensive data on Indian production, despatch, pit-head closing stock, import & export, among others. The report can be considered as a reference guide for different stakeholders and research professional who are interested in assessing the dynamics and present situation of coal's contribution to the Indian economy.

Amidst this ongoing global pandemic, the coal industry has been relentlessly serving the nation and addressing the energy requirements. I appreciate the efforts of Coal Controller's Organisation and the entire team led by Ms. Santosh for this publication. Warmest congratulations to the team for the successful publication.

## Foreward

Coal, the main fossil fuel of the country, is the backbone of energy production. Coal-fired power plants meet more than 70% of India's electricity demand and needs of Steel, Cement, Fertilizer industries and brick kilns. Hence, the performance of this sector is crucial for the economic growth and development of the country at least in the near future even though push for renewable energy is being given across the globe. As this fossil fuel is going to play a very important role therefore, data driven decision making is of immense importance for efficient and optimum utilization of the fuel.

The Coal Controller's Organization has been carrying out the task of collection and dissemination of data related to the coal and lignite sector of the country for the past many years . This data is used primarily by Ministry of Coal, related Ministries and Organizations, Research and Planning bodies etc. The "Provisional Coal Statistics 2020-21", has been brought out to meet the immediate requirement of data by the various stakeholders.This publication incorporates provisional information on coal, coal products and lignite for the preceding financial year 2020-21 in addition to data for the past few years on Reserve, Production, Dispatch, Pit-head Closing Stock, Import and Export of coal, performances by the Captive Blocks and Washeries. The final annual data, like every year, will be published in the "Coal Directory of India 2020-21".

I believe that the publication would be useful to all relevant stakeholders. My sincere gratitude to the Hon'ble Minister Sri Prahlad Joshi, Secretary (MoC) and all senior officers for their able guidance. I also wish to congratulate and place on record my sincere appreciation to the Officers and staff of the Coal Controller's Organisation who contributed in bringing out this publication. Suggestions for further improvement in content as well as design in the publication are solicited and would be appreciated.

# Highlights

# I. Highlights

## 1. Production & Productivity

**1.1** In the year 2020-21, total production of raw coal in India was 716.084 MT whereas it was 730.874 MT in 2019-20, showing a negative growth of 2.02% over the previous year. In the year 2020-21, production of lignite was 36.614 MT against 42.096 MT in 2019-20, showing a negative growth of 13.02% over the year 2019-20 [Ref table: 2.1]. In the year 2020-21, production of coking coal was 44.787 MT whereas it was 52.936 MT in 2019-20, showing a decrease of 15.39% over the previous year. In 2020-21, production of non-coking coal was 671.297 MT against 677.938 MT in 2019-20, showing a negative growth of 0.98% over the previous year 2019-20 [Ref table: 2.10]. In the year 2020-21, production of washed coal (coking) was 4.890 MT against 5.285 MT in 2019-20, thus showcasing a decline of 7.47% over 2019-20. In 2020-21, production of middling (coking) was 3.783 MT against 3.547 MT in 2019-20, thus showing a growth of 6.65% over 2019-20 [Ref table: 2.3].

The contribution of public sector and private sector in the production of raw coal in 2020-21 was as follows: [Ref table: 2.10]

Production of Raw Coal in 2020-21 (MT)			
Sector	Coking	Non-Coking	Total Coal
Public	38.934	647.017	685.951
Private	5.853	24.280	30.133
<b>All India</b>	<b>44.787</b>	<b>671.297</b>	<b>716.084</b>

**1.2** In the year 2020-21, Chhattisgarh registered highest coal production of 158.409 MT (22.12%), followed by Odisha 154.150 MT (21.53%), Madhya Pradesh 132.531 MT (18.51%), and Jharkhand 119.296 MT (16.66%). In 2020-21, Tamil Nadu was the largest producer of lignite and produced 18.026 MT (49.23%), followed by Gujarat 9.533 MT (26.04%) and Rajasthan 9.056 MT (24.73%) [Ref table: 2.6 & 2.7]. In the year 2020-21, Coal India Limited produced 596.219 MT (83.26%) and SCCL 50.580 MT (7.06%) of coal. In that year, main producer of lignite was Neyveli Lignite Corporation that produced 19.262 MT (52.61%) [Ref table: 2.10]. Like previous years, in the year 2020-21, Jharkhand was the highest producer of coking coal and produced 44.387 MT, which was 99.11% of total coking coal production of 44.787 MT. As the highest non-coking coal producing state, Chhattisgarh produced 158.190 MT (23.56%), followed by Odisha 154.150 MT (22.96%) and Madhya Pradesh 132.350 (19.72%) [Ref table: 2.8].

**1.3** In the year 2020-21, 95.64% of coal production in India was from Open Cast mines (684.862 MT) and the rest 4.36% was from Under Ground mines (31.222 MT) [Ref table: 2.15]. MCL was the highest producer of coal from Open Cast mines and produced 147.477 MT (21.53%) followed by SECL 135.227 MT (19.75%) and NCL 115.042 MT (16.80%). GP-IV/I, IV/2 & IV/3 is excluded here in the given quantity of SECL [Ref table: 2.16]. SECL was the highest producer of coal from Under Ground mines and produced 12.176 MT (39.00%), followed by ECL 9.309 MT (29.82%) and SCCL 4.424 MT (14.17%) [Ref table: 2.16]. Output per Manshift (OMS) of Open Cast mines in 2020-21 was 14.01 tonnes for CIL and 13.86 tonnes for SCCL. OMS for Under Ground mines of CIL was 1.06 tonnes and for SCCL it was 0.92 tonnes. OMS is the output measured in tonnes per unit of man-shift [Ref table: 2.18]. Overall stripping ratio for the year 2020-21 was 2.81. Stripping ratio is defined as the ratio of over burden removal to coal produced in open cast mining [Ref table: 2.19].

## 2. Despatch & Off-take

**2.1** In the year 2020-21, despatch of indigenous raw coal was 690.888 MT against 707.176 MT in 2019-20, thus there was a decline of 2.30% when compared with the dispatch quantity of 2019-20. In this year, despatch of lignite was 37.220 MT against 42.267 MT in 2019-20, showcasing a decline of 11.94% from the previous year [Ref table: 3.1]. In the year 2020-21, despatch of coking coal decreased from 50.656 MT in 2019-20 to 44.001 MT in 2020-21, showing a decrease by 13.14% in 2020-21 [Ref table: 3.8]. In the year 2020-21, despatch of non-coking coal was 646.887 MT whereas it was 656.520 MT in 2019-20, thus the total dispatch decreased by 1.47% over 2019-20 [Ref table: 3.8]. In the year 2020-21, despatch of washed coal (coking) was 4.827 MT against 5.305 MT in 2019-20, depicting a decline of 9.01% over 2019-20. In 2020-21, despatch of middling (coking) was 3.326 MT against 3.591 MT in 2019-20, showcasing a decrease of 7.38% over 2019-20 [Ref table: 3.3].

The contribution of public sector and private sector in the dispatch of raw coal in 2020- 21 was as follows: [Ref table: 3.8]

Despatch of Raw Coal in 2020-21 (MT)			
Sector	Coking	Non-coking	Total Coal
Public	38.151	622.996	661.147
Private	5.850	23.891	29.741
All India	<b>44.001</b>	<b>646.887</b>	<b>690.888</b>

**2.2** In the year 2020-21, major quantity of coal was despatched from Odisha 151.912 MT (21.99%), followed by Chhattisgarh 146.249 MT (21.17%), Jharkhand 117.959 MT (17.07%), Madhya Pradesh 105.385 MT (15.25%) and Telangana 50.533 MT (7.31%) [Ref table: 3.6]. In case of lignite despatch, Tamil Nadu had the highest share of 18.516 MT (49.75%), followed by Gujarat 9.548 MT (25.65%) and Rajasthan 9.156 MT (24.60%) [Ref table: 3.7].

**2.3** Out of the total despatch of raw coal in the year 2020-21, despatch of CIL was 573.626 MT (83.03%) and SCCL was 48.513 MT (7.02%). Among the other PSUs, maximum coal was despatched by RRVUNL 15.000 MT (2.17%). Despatch of coal from private sector was 29.741 MT, in which SPL had the largest share of 18.068 MT (60.75%), followed by TSL 5.850 MT (19.67%) [Ref table: 3.8].

**2.4** Power sector continued to be the largest user of coal. In 2020-21, the dispatch of coal in power sector was 580.558 MT (84.03%) and other than power sector, coal was mainly dispatched to the steel sector (8.943 MT i.e., 1.29%), sponge iron sector (9.572 MT, i.e., 1.39%), and cement sector (6.751 MT, i.e., 0.98%), among others [Ref table: 3.14].

### 3. Pit-head Closing Stock

**3.1** Pit-head closing stock of raw coal at the end of 2020-21 was 109.185 MT against 81.432 MT at the end of 2019-20. Closing Stock of lignite at the end of 2020-21 was 4.891 MT, whereas it was 5.495 MT at the end of 2019-20. Out of total closing stock at the end of 2020-21, share of public sector was 98.85% (107.927 MT) [Ref table: 4.3].

### 4. Import & Export

**4.1** In the year 2020-21, total import of coal was 214.995 MT compared to 248.537 MT in 2019-20, thus showcasing a decline of 13.50% over 2019-20. In 2020-21, import of coking coal was 51.288 MT whereas it was 51.833 MT in 2019-20, depicting a decline of 1.05% when compared with 2019-20. Import of non-coking coal was 163.707 MT in 2020-21 compared to 196.704 MT in 2019-20, which indicated a decline of 16.78% over 2019-20 [Ref table: 5.1].

**4.2** In the year 2020-21, coal was mainly imported from Indonesia (92.535 MT), Australia (54.953 MT), South Africa (31.143 MT), USA (12.204 MT), Russia (6.749 MT), Singapore (4.486 MT) and Mozambique (3.570 MT) [Ref table: 5.3]. In the year 2020-21, so far port wise import of coal was concerned, import was mainly through Krishnapatnam (18.323 MT), Gangavaram (17.528 MT), Mundra (16.496 MT), Paradip Sea (17.090 MT), Kandla Sea (15.974 MT), Dhamra (15.268 MT), Sez Mundra (13.995 MT), among others [Ref table: 5.5].

**4.3** In the year 2020-21, export of coal was 0.800 MT compared to 1.030 MT in 2019-20. Coal was mainly exported to Nepal (0.618 MT) and Bangladesh (0.104 MT) [Ref table: 5.4]. Coal was mainly exported through Nautanwa (Sonauli) (0.297 MT) and Nepalganj (0.200 MT). [Ref table: 5.6].

## 5. Captive & Commercial Block

**5.1** In the year 2020-21, the total production of raw coal from captive coal blocks in India was 66.352 MT compared to 61.296 MT in 2019-20. In 2020-21, dispatch of coal from captive coal blocks was 62.466 MT compared to 59.966 MT in 2019-20 [Ref table: 2.12 and 3.10].

## 6. Geological Resources & Exploration

**6.1** As per Geological Survey of India, geological reserves of coal in India as on 01.04.2020 was 3,44,021 Million Tonnes. The type wise break up of coal reveals that reserve of coking coal (prime, medium and semi-coking) was 35,004 MT and non-coking coal was 3,09,017 MT. The data for 2020-21 has not been provided here as the data was not received from GSI. The data shall be revised and updated in the Coal Directory 2020-2021. Total coal extracted since 1950 up to 2020-21 was around 1,72,96,897 TT.

## **Concepts, Definitions and Practices**

## II. Concepts, Definitions and Practices

**1. Coal:** Coal is a combustible sedimentary rock formed from ancient vegetation which has been consolidated between other rock strata and transformed by the combined effects of microbial action, pressure and heat over a considerable time period. This process is commonly called 'coalification'. Coal occurs as layers or seams, ranging in thickness from millimeters to many tens of metres. It is composed mostly of carbon (50–98 per cent), hydrogen (3–13 per cent) and oxygen, and smaller amounts of nitrogen, sulphur and other elements. It also contains water and particles of other inorganic matter. When burnt, coal releases energy as heat which has a variety of uses.

### 2. Classification of Coal

**2.1** Coal refers to a whole range of combustible sedimentary rock materials spanning over a continuous quality scale. For convenience, this continuous series is often divided into two main categories, namely hard coal and brown coal. These are further divided into two sub-categories as given below.

- **Hard Coal**
  - Anthracite
  - Bituminous coal
  - Coking coal
  - Other bituminous coal
- **Brown coal**
  - Sub-bituminous coal
  - Lignite

**2.2** In practice, hard coal is calculated as the sum of anthracite and bituminous coals. Anthracite is a high-rank, hard coal used mainly for industrial and residential heat raising. Bituminous coal is a medium-rank coal used for gasification, industrial coking and heat raising and residential heat raising. Bituminous coal that can be used in the production of a coke capable of supporting a blast furnace charge is known as coking coal. Other bituminous coal, not included under coking coal, is also commonly known as thermal coal. This also includes recovered slurries, middling and other low-grade, higher-rank coal products not further classified by type.

**2.3** Classifying different types of coal into practical categories for use at an international level is difficult because divisions between coal categories vary between classification systems, both national and international, based on calorific value, volatile matter content, fixed carbon content, caking and coking properties, or some combination of two or more of these criteria.

**2.4** Although the relative value of the coals within a particular category depends on the degree of dilution by moisture and ash and contamination by sulphur, chlorine, phosphorous and certain trace elements, these factors do not affect the divisions between categories.

**2.5** The International Coal Classification of the Economic Commission for Europe (UNECE) recognizes two broad categories of coal:

**Hard Coal –** Coal of gross calorific value not less than 5700 kcal/kg (23.9 GJ/t) on an ash-free but moist basis and with a mean random reflectance of vitrinite of at least 0.6

**Brown Coal -** Non-agglomerating coal with a gross calorific value less than 5700 kcal/kg (23.9 GJ/t) containing more than 31% volatile matter on a dry mineral matter free basis.

**2.6** It should be stressed that the above classification system is based on the inherent qualities of the coal in question and not on the final use of the coal. In this way the classification system attempts to be objective and simple to apply.

### 3. Classification of Coal in India

**3.1** In India coal is broadly classified into two types – coking and non-coking. The former constitutes only a small part of the total coal resources of the country. These two are further subdivided as follows on the basis of certain physical and chemical parameter as per the requirement of the industry.

**3.2 Coking Coal:** Coking coal, when heated in the absence of air, form coherent beads, free from volatiles, with strong and porous mass, called coke. Coking coal has coking properties and is mainly used in steel making and metallurgical industries.

**3.3 Semi Coking Coal:** Semi coking coal, when heated in the absence of air, form coherent beads not strong enough to be directly fed into the blast furnace. Such coal is blended with coking coal in adequate proportion to make coke. Clearly, semi coking coal has comparatively fewer coking properties than coking coal. It is mainly used as blendable coal in steel making, merchant coke

manufacturing and other metallurgical industries.

**3.4 Non-Coking Coal:** Non-Coking Coal does not have coking properties and is mainly used for power generation. It is also used for cement, fertilizer, glass, ceramic, paper, chemical and brick manufacturing, and for other heating purposes.

**3.5 Washed Coal:** Processing of coal through water separation mechanism to improve the quality of coal by removing denser material (rocks) and high ash produces washed coal which has less ash, higher moisture, better sizing, better consistency, less abrasive, etc. The washed coking coal is used in manufacturing of hard coke for steel making. Washed non-coking coal is used mainly for power generation but is also used by cement, sponge iron and other industrial plants.

**3.6 Middlings and Rejects:** In the process of coal washing, apart from clean coal we also get two by-products, namely, middlings and rejects. Clean coal has low density whereas rejects have high density. Middlings have intermediate density. Rejects contain high ash, mineral impurities, fraction of raw coal feed, etc. and are used for Fluidized Bed Combustion (FBC) boilers for power generation, road repairs, briquette (domestic fuel) making, land filling, etc. Middlings are fraction of raw coal feed having values of classificatory parameters between that of clean coals and rejects. It is used for power generation. It is also used by domestic fuel plants, brick manufacturing units, cement plants, industrial plants, etc.

**3.7 Hard Coke:** Solid product obtained from carbonization of coal, used mainly in the iron & steel industry.

## 4. Categorization of Coal in India

**4.1** In India, coking coal has been categorized or graded on the basis of ash content as per following scheme:

Grade	Ash Content
Steel Gr I	Ash content < 15%
Steel Gr II	15%≤Ash content<18%
Washery Gr. I	18%≤Ash content<21%
Washery Gr. II	21%≤Ash content<24%
Washery Gr. III	24%≤Ash content<28%
Washery Gr. IV	28%≤Ash content<35%
Washery Gr. V	35%≤Ash content<42%
Washery Gr. VI	42%≤Ash content<49%

**4.2** In India, semi coking coal has been categorized or graded on the basis of ash and moisture content as per following scheme:

Grade	Ash + Moisture content
Semi coking Gr. I	Less than 19%
Semi coking Gr. II	Between 19% and 24%

**4.3** In India, non-coking coal had been categorized or graded on the basis of Useful Heat Value (UHV) as per following scheme:

Grade	Useful Heat Value
A	UHV > 6200 KCal/Kg
B	6200 ≥UHV(KCal/Kg)>5600
C	5600 ≥UHV(KCal/Kg)>4940
D	4940 ≥UHV(KCal/Kg)>4200
E	4200 ≥UHV(KCal/Kg)>3360
F	3360 ≥UHV(KCal/Kg)>2400
G	2400 ≥UHV(KCal/Kg)>1300

N.B 1: "Useful heat value" is defined as:

$$\text{UHV} = 8900 - 138 (\text{A} + \text{M})$$

Where UHV = Useful heat value in KCal/kg, A=Ash content (%), M=Moisture content (%).

N.B 2: In the case of coal having moisture less than 2 percent and volatile content less than 19 percent the useful heat value shall be the value arrived as above reduced by 150 kilo calories per kilogram for each 1 percent reduction in volatile content below 19 percent fraction pro- rata.

N.B 3: Both moisture and ash are determined after equilibrating at 60 percent relative humidity and 40 degree C temperature.

N.B 4: Ash percentage of coking coals and hard coke shall be determined after air drying as per IS1350 -1959. If the moisture so determined is more than 2 percent, the determination shall be after equilibrating at 60 percent relative humidity at 40 degree C temperature as per IS: 1350 - 1959.

**4.4** In order to adopt the best international practices, India decided to switch over from the grading based on Useful Heat Value (UHV) to the grading based on Gross Calorific Value (GCV) and therefore on 16.01.2011 the Ministry of Coal notified the switch over. As per the new system, following nomenclature has been introduced for gradation of non-coking coal.

Grades	GCV Range (Kcal/Kg)
G1	GCV exceeding 7000
G2	GCV between 6701 and 7000
G3	GCV between 6401 and 6700
G4	GCV between 6101 and 6400
G5	GCV between 5801 and 6100
G6	GCV between 5501 and 5800
G7	GCV between 5201 and 5500
G8	GCV between 4901 and 5200
G9	GCV between 4601 and 4900
G10	GCV between 4301 and 4600
G11	GCV between 4001 and 4300
G12	GCV between 3700 and 4000
G13	GCV between 3400 and 3700
G14	GCV between 3101 and 3400
G15	GCV between 2801 and 3100
G16	GCV between 2501 and 2800
G17	GCV between 2201 and 2500

**4.5** Based on the GCV ranges of proposed gradation and erstwhile gradation, a concordance table is generated for better understanding. However, it may be noted that this concordance does not depict exact one-to-one relation between the two systems.

Table 5: Concordance Table	
Old Grading based on UHV	New Grading based on GCV
A	G1
	G2
	G3
B	G4
	G5
C	G6
D	G7
	G8
E	G9
	G10

F	G11
	G12
G	G13
	G14
Non-coking Coal Ungraded	G15
	G16
	G17

## 5. Some General Concepts

**5.1 Run-of-Mine (ROM) Coal:** The coal delivered from the mine to the Coal Preparation Plant (CPP) is called run-of-mine (ROM) coal. This is the raw material for the CPP and consists of coal, rocks, middlings, minerals and contamination. Contamination is usually introduced by the mining process and may include machine parts, used consumables and parts of ground engaging tools. ROM coal can have a large variability of moisture and particle size.

**5.2 Open Cast Mining:** Open-pit mining, open-cut mining or open cast mining is a surface mining technique of extracting rock or minerals from the earth by their removal from an open pit or borrow. This form of mining differs from extractive methods that require tunneling into the earth such as long wall mining. Open-pit mines are used when deposits of commercially useful minerals or rock are found near the surface; that is, where the overburden (surface material covering the valuable deposit) is relatively thin or the material of interest is structurally unsuitable for tunneling (as would be the case for sand, cinder, and gravel). For minerals that occur deep below the surface - where the overburden is thick or the mineral occurs as veins in hard rock - underground mining methods extract the valued material.

**5.3 Under Ground Mining of Coal:** It refers to a group of underground mining techniques such as Longwall Mining, Room-And-Pillar Mining, etc. used to extract coal from sedimentary ("soft") rocks in which the overlying rock is left in place, and the mineral (coal) is removed through shafts or tunnels.

**5.4 Despatch and Off-take:** The term "Despatch" as used in this compilation is to mean all the despatch to different sectors but exclude collieries' own consumption (boiler coal used in collieries and supply to employee). On the other hand, "Off- take" means total quantity of raw coal lifted for consumption and naturally includes colliery consumption. Therefore,

$$\text{Off-take} = \text{Despatch} + \text{Colliery Consumption.}$$

**5.5 Change of Stock:** Change of Stock means the difference between opening and closing stock of an item.

**5.6 Pit-head Stock:** The term "Pit-head Closing Stock" of raw coal is used in this compilation to mean all the raw coal stock at pit- head of collieries.

**5.7 Pit-head Value:** Pit-head value of coal is the value of coal at pit-head of the colliery. It is computed on the basis of basic price and therefore it does not involve any cost of loading, transportation from pit-head, cess, royalty, sales tax, stowing excise duty etc. This approach is followed by all non-captive coal companies, viz., CIL subsidiaries, Singareni Collieries Company Ltd. (SCCL), Jharkhand State Mineral Development Corporation Ltd. (JSMDCL) and Jammu & Kashmir Mineral Ltd. (JKML).

**5.7.1** In case of captive collieries, pit-head value of coal depends upon their accounting policy. If the costing of coal is done on no-profit-no-loss basis then pit-head value is

calculated accordingly. This practice is found to be followed in captive collieries of public sector units.

**5.7.2** On the other hand, if the captive colliery is treated as independent commercial unit, then pit-head value is calculated on the basis of unit value of realization, which includes cost price and profit/loss per unit but excludes any transportation cost from pit-head, cess, royalty, sales tax, stowing excise duty etc. This is particularly followed in private captive colliery which is in contract to supply coal to any priority sector for which captive colliery is permitted (steel, iron, power, cement, etc.).

**5.7.3** Even there are private sector collieries being managed by the parent company engaged in manufacturing of steel and iron, power, cement for which captive collieries are allowed. Due to non-availability of value figures from these companies, pit-head value of coal is determined on the basis of nearest Coal India subsidiary price rate considering comparable grade and location. Though this may not be a correct price and would not depict a true picture, yet we use it because this is one of the acceptable estimates.

**5.7.4** While using value data it is to be kept in mind that these data are useful for macro-level study or trend study. However, the quality of coal has been deteriorating over the years, quite inversely proportional to the open cast production share in the total production. Thus, the comparison of unit value over the years would not reflect correct picture of inflation until this deteriorating effect of quality is not considered and that effect is removed.

**5.7.5** It may be concluded that, in India, unit value (Rs.) of coal in terms per kilo calorie useful heat value has been increasing more

rapidly than being exhibited by simple unit value comparison over the years.

## 6. Commodity Classification

**6.1** For export import data, the 8-digit codes of Indian Trade Classification (based on Harmonized Coding System) have been adopted by DGCI&S in classifying the various

grades of coal and coal products. For coking coal, the only 8-digit code is “27011910” and all other codes of coal are taken as non-coking coal (mainly pertains to remaining part of 2701, some parts of 2702 & 2703). Similarly, for all items in 2704 group have been taken under coke. The effect of retort carbon is negligible and is included under coke.

## Key Findings

### III. Key Findings

Provisional Coal Statistics 2020-21 is the latest Statistical Report on Coal in India based on the data received from various Indian coal companies. As the data provided here are based on pre-audited reports of the companies for the year 2020-21, the coal statistics has been termed as provisional. However, to provide a glimpse of the variation between the provisional statistics and the final one, presented below is the corresponding figures for last eight years along with the provisional figures for 2020-21.

Year	Item	Production				Despatch			
		(Quantity in Million Tonnes)				(Quantity in Million Tonnes)			
		Coking Coal	Non Coking Coal	Total Coal	Lignite	Coking Coal	Non Coking Coal	Total Coal	Lignite

N.B: F=Final, P=Provisional

Provisional Coal Statistics 2020-21, apart from providing data on production, despatch and stock of coal and lignite in India for the year 2020-21 also provides data on coal reserves in India as on 01-04-2020, import and export of coal, performance of captive mining etc.

In this report of 2020-21, like previous years, specific information has been provided regarding performance of captive coal blocks so far production, despatch and closing stock are concerned. Segregation has been made between the coal blocks in public sector and private sector on the basis of the original allotment made between public sector and private sector. Performance of coal blocks so far production, despatch and closing stock is concerned, is shown in the corresponding tables of this publication.

As the purpose of the publication of the Provisional Coal Statistics 2020-21 is to provide quick results to all stakeholders, users, planners, etc., a detailed analysis like the one attempted in the Coal Directory has not been preferred here. Therefore, the report contains only an introductory note followed by tables and charts depicting various aspects of coal statistics.

## Indian Coal and Lignite Deposits

The Indian coal deposits are primarily concentrated in the Gondwana sediments (Upper Paleozoic to Mesozoic systems) located in the Eastern and Central parts of Peninsular India and also in parts of North Eastern Regions viz., Sikkim, Assam and Arunachal Pradesh. The coal is of bituminous to sub-bituminous rank and is restricted to the sediments of Permian age. Indian lignite deposits are in the Tertiary sediments in the Southern & Western parts of the peninsular shield, particularly in Tamil Nadu, Pondicherry, Gujarat, Rajasthan and Jammu & Kashmir. It is also available, in minor quantity, in Kerala & West Bengal. As per Geological Survey of India, the reserve position for coal as well as lignite for last three years has been as follows:

Statement 2: Inventory of Geological Resources & Exploration of Coal in India						
Name of the Mineral	As on	Reserve (Mill. Tonnes)				
		Proved	Indicated	Inferred	Total	
(1)	(2)	(3)	(4)	(5)	(6)	
Coal	01/04/2018 *	1,48,787	1,39,164	31,069	<b>3,19,020</b>	
	01/04/2019 *	1,55,614	1,40,501	30,381	<b>3,26,496</b>	
	01/04/2020 *	1,63,461	1,50,392	30,168	<b>3,44,021</b>	
Lignite	01/04/2018	6,541	26,389	12,734	<b>45,664</b>	
	01/04/2019	6,788	26,237	12,734	<b>45,759</b>	
	01/04/2020	6,788	26,237	12,994	<b>46,019</b>	

\* Including Sikkim. The distribution of the coal and lignite reserves over the regions/states and by type in India and other details may be seen from table 1.7, 1.8 and 1.9.

## 1. Production of Coal and Lignite in India

**1.1** In the year 2020-21, coal production in India reached 716.084 MT and registered a negative growth of 2.02% over the last year. During this period production of lignite reached 36.614 MT registering a negative growth of 13.02% over the last year. Statement 3(A) shows domestic production of coal in 2020-21 by public and private sectors.

Statement 3(A): Coal Production in India by Company			
Company	Coal Production (2020-21) [MT]		
	Coking	Non-coking	Total
CIL	38.842	557.377	596.219
SCCL		50.580	50.580
Other Public	0.092	39.060	39.152
Total Public	38.934	647.017	685.951
Total Private	5.853	24.280	30.133
<b>All India</b>	<b>44.787</b>	<b>671.297</b>	<b>716.084</b>

**1.2** It can be seen that Coal India Limited alone accounted for 83.26% of coal production in the country and share of SCCL was 7.06%. Share of public sector was 95.79% and that of private sector was 4.21%. Performance of subsidiary companies of Coal India Limited may be seen from statement 3(B). From statement 3(A) and 3(B) it can be seen that the major contributors in all India coal production were MCL (20.67%), SECL (20.58%) and NCL (16.07%). These three subsidiary companies of CIL collectively accounted for 57.32% of total coal production at all India level and 69.38% of production by CIL group.

Statement 3(B): Coal Production in India by CIL Subsidiary Wise coal production			
Company	Coal Production (2020-21) [MT]		
	Coking	Non-coking	Total
ECL	0.015	44.989	45.004
BCCL	23.384	1.272	24.656
CCL	15.043	47.546	62.589
NCL		115.042	115.042
WCL	0.181	50.094	50.275
SECL**	0.219	150.386	150.605
MCL		148.012	148.012
NEC		0.036	0.036
CIL	38.842	557.377	596.219

\*\* Including GP-IV/1 & GP-IV/2&3

**1.3** From the Statement 3(A) it can also be seen that by type of coal, major contribution in total coal production was of non-coking coal (93.49%) and 6.51% was coking coal.

**1.4** From table 2.2, it can be seen that in the year 2020-21 production of coking coal decreased by 15.39% over the previous year 2019-20 and non-coking coal production decreased by 0.98% over the previous year.

**1.5** Statement 4 shows coal production in India during 2020-21 by states. It may be observed that the four major states were Chhattisgarh (22.1%), Odisha (21.5%), Madhya Pradesh (18.51%) and Jharkhand (16.66%). These four states together contributed about 78.82% of the total coal production in the country.

Statement 4: Coal Production in India by State			
States	Coal Production (2020-21) [MT]		
	Coking	Non-Coking	Total
Assam		0.036	0.036
Chhattisgarh	0.219	158.190	158.409
J & K		0.012	0.012
Jharkhand	44.387	74.909	119.296
Madhya Pradesh	0.181	132.350	132.531
Maharashtra		47.435	47.435
Odisha		154.150	154.150
Telangana		52.603	52.603
Uttar Pradesh		17.016	17.016
West Bengal		34.596	34.596
<b>All India</b>	<b>44.787</b>	<b>671.297</b>	<b>716.084</b>

**1.6** Considering coal production from the technology point of view it can be seen from table 2.15 that in the year 2020-21 production from Open Cast mining was 684.862 MT which accounted for 95.64% of the total coal production and the rest 31.222 MT i.e., 4.36% was from the Under Ground mining. It is interesting to note that the share of Open Cast mining in total coal production has been steadily increasing over time and in the last ten years it has increased from 90.38% in 2011-12 to 95.64% in 2020-21.

**1.7** It can be seen from table 2.3 that production of coal products decreased from 42.579 MT in the year 2019-20 to 41.452 MT in the year 2020-21. Out of total coal products in 2020-21, production of washed coal (coking) was 4.890 MT and washed coal (non-coking) was 18.432 MT.

**1.8** Table 2.13 and 2.14 show details of coal production by type (coking and non-coking) and grade by each company for the year 2020-21.

**1.9** Stripping Ratio defined as the ratio of OBR (over burden removal) to coal produced in Open Cast mining has been of interest to the researchers and planners. From table 2.19, it can be seen that in the year 2020-21, the stripping ratio at all India level was 2.81, the corresponding figure for the year 2019-20 was 2.55. Stripping ratio of CIL for 2020-21 was 2.36 and 2.02 in the year 2019-20. In the year 2020-21, stripping ratio for the public sector as a whole was 2.76 and for the private sector it was 4.03. In case of CIL companies, NEC reported the highest stripping ratio of 17.17 against coal production (OC) of 0.036 MT whereas MCL reported the lowest stripping ratio of 1.18 against coal production (OC) of 147.477 MT.

**1.10** Output per man shift (OMS) is one of the measures of efficiency in coal production. Statement 5 shows OMS in respect of type of mines i.e., OC and UG for the year 2020-21 and 2019-20 for two major players in the public sectors namely CIL and SCCL. From table 2.17, it can be seen that OMS for CIL in respect of open cast mining (OC) has shown an increasing trend in last ten years which increased from 10.40 in 2011-12 to 14.01 in 2020-21. In case of SCCL it increased from 13.26 in 2011-12 to 13.86 in 2020-21. Further details on the issue can be seen from the table 2.18.

Statement 5: OMS (Tonnes) in OC & UG Mines in 2019-20 and 2020-21 (CIL & SCCL)			
Type of Mining	Company	Year	
		2019-20	2020-21
OC	CIL	17.90	14.01
	SCCL	16.57	13.86
UG	CIL	0.99	1.06
	SCCL	1.44	0.92
Overall	CIL	9.64	9.09
	SCCL	4.89	5.62

**1.11** In table 2.10, it is shown that production of lignite in the year 2020-21 was 36.614 MT whereas it was 42.096 MT in 2019-20 showing a negative growth of 13.02% over the previous year. Statement 6 shows production of lignite by different companies in 2019-20 and 2020-21. In the year 2020-21, four major producing companies with share in total production were NLC (52.61%), BLMCL (16.44%), GMDCL (16.40%), and GIPCL (9.58%).

Statement 6: Lignite Production (MT) in India by Companies in 2019-20 and 2020-21		
Company	2019-20	2020-21
NLC	24.864	19.262
GMDCL	6.957	6.004
GIPCL	3.342	3.508
RSMML	0.790	0.830
GHCL	0.058	0.021
VSLPPL	0.672	0.971
BLMCL	5.413	6.018
<b>All India</b>	<b>42.096</b>	<b>36.614</b>

## 2. Despatch

**2.1** In the year 2020-21, despatch of raw coal was 690.888 MT against 707.176 MT in the year 2019-20, thus resulting in a negative growth of 2.3% over the previous year.

**2.2** Statement 7 shows despatch of coal by different companies in the year 2020-21. It can be seen that Coal India Limited alone accounted for 83.02% of overall coal despatch in the country, while the share of SCCL in coal despatch was 7.02%. The contribution of the private sector was 4.30%. In CIL group of companies, share of SECL in all India coal despatch during 2020-21 was 19.62%, MCL 21.13% and NCL 15.73%. These three subsidiary companies of CIL collectively accounted for 56.48% of raw coal despatch in all India level.

Statement 7: Coal Despatch in India by Company- 2020-21			
Company	Coal Despatch [MT]		
	Coking	Non-coking	Total
ECL	0.018	41.844	41.862
BCCL	22.113	1.057	23.170
CCL	15.473	49.927	65.400
NCL		108.644	108.644
WCL	0.184	49.504	49.688
SECL	0.271	138.493	138.764
MCL		146.008	146.008
NEC		0.090	0.090
CIL	38.059	535.567	573.626
SCCL		48.513	48.513
Other Public	0.092	38.916	39.008
Total Public	38.151	622.996	661.147
Total Private	5.850	23.891	29.741
<b>All India</b>	<b>44.001</b>	<b>646.887</b>	<b>690.888</b>

**2.3** Statement 8 shows details of off-take of raw coal in India in the year 2020-21 by different sectors of economy. Analysis of total off-take by different sector shows that power sector accounted for 84.01% of total raw coal off-take. Further details are shown in table 3.14.

Statement 8: Off-take of Raw Coal in India in 2020-21 by Sector	
Sector	Off-take [MT]
Power (Utility)	510.265
Power (Captive)	70.293
Steel	8.943
Cement	6.751
Fertilizers	1.527
Sponge Iron	9.572
Other Basic-Metal	0.683
Chemical	0.197
Pulp & Paper	1.045
Textiles & Rayons	0.084
Bricks	0.025
Others	81.503
<b>Total Despatch</b>	<b>690.888</b>
Colliery Consumption	0.196
<b>Total Off-take</b>	<b>691.084</b>

**2.4** Table 3.11 and 3.12 show details of coal despatch by type (coking and non-coking) and grade of coal by each company during the year 2020-21.

**2.5** From Statement 9, it can be seen that despatch as well as off-take of lignite in the year 2020-21 was 37.220 MT. Like coal, lignite was mainly despatched to power sector and share was 84.47% of total off-take. Besides this, lignite was despatched to other sectors also as shown in the statement below.

Statement 9: Off-take (MT) of Lignite by Sector in India – 2020-21	
Sector	Off-take
Power (Utility)	10.254
Power (Captive)	21.185
Steel	0.025
Cement	0.811
Fertilizer	0.000
Other Basic Metal	0.000
Chemical	0.368
Pulp & Paper	2.064
Textiles & Rayons	0.748
Bricks	0.426
Others	1.341
<b>Total Despatch</b>	<b>37.220</b>
Colliery Consumption	0.000
<b>Total Off-take</b>	<b>37.220</b>

### 3. Pit-head Closing Stock

Statement 10: Pit-head Closing Stock of Coal and Lignite in India in Last Ten Years

Year	Pit Head Closing Stock [MT]	
	Raw Coal	Lignite
2011-12	74.040	1.051
2012-13	63.049	1.493
2013-14	55.514	1.860
2014-15	59.389	3.176
2015-16	65.361	4.809
2016-17	76.889	6.883
2017-18	62.036	7.210
2018-19	57.640	5.672
2019-20	81.432	5.495
2020-21	109.185	4.891

A complete understanding of production and despatch of coal requires a discussion on the pit-head closing stock. It is to be noted that whenever we talk about pit-head closing stock of coal we refer to raw coal. From Statement 10, it can be seen that the pit-head closing stock as on 31-03-2021 of coal and lignite was 109.185 MT and 4.891 MT respectively.

**3.1** Statement 10 provides trend for last ten years for pit-head closing stock of coal and lignite. It can be seen that in case of coal pit-head closing stock was 74.040 MT in the year 2011-12, however, for the year 2012-13 and 2013-14, it showed decreasing trend. Thereafter it again showed increasing trend till 2016-17 and decreased again in 2017-18 and 2018-19 and it again increased in 2019-20 and 2020-21. In case of lignite, closing stock has been showing upward trend since the year 2011-12 till 2017-18.

**3.2** Statement 11 shows pit-head closing stock of coal of CIL- subsidiaries, SCCL and others as on 31-03-2020 and 31-03-2021. It can be seen that in 2020-21, CIL registered an increase of 32.25% in its pit-head closing stock of coal. In the CIL Group, there was significant increase of closing stock in SECL, MCL and NCL. There was also significant increase of closing stock in case of SCCL and private sector. Further details on this aspect may be seen from tables 4.1 to 4.3.

Statement 11: Company Wise Pit-head Closing Stock of Raw Coal (MT)		
Company	As on	
	31/03/2020	31/03/2021
ECL	3.336	6.302
BCCL	2.314	3.800
CCL	13.302	10.491
NCL	3.999	10.396
WCL	14.296	14.879
SECL	17.875	29.707
MCL	19.879	23.688
NEC	0.054	0.000
CIL	75.055	99.263
SCCL	3.188	5.239
Others Public	2.325	3.425
Total Public	80.568	107.927
Total Private	0.864	1.258
<b>All India</b>	<b>81.432</b>	<b>109.185</b>

Statement 12: Company Wise Pit-head Closing Stock of Lignite (MT)		
Company	As on	
	31/03/2020	31/03/2021
NLC	5.059	4.570
GMDCL	0.000	0.000
GIPCL	0.000	0.000
GHCL	0.028	0.014
RSMML	0.000	0.000
VSLPPL	0.020	0.064
BLMCL	0.388	0.243
<b>Total</b>	<b>5.495</b>	<b>4.891</b>

## 4. Import & Export

**4.1** In spite of sufficient coal reserve, we have not been able to meet our demand from our own production. Moreover, the supply of high-quality coal (low-ash coal) in the country has been limited. Therefore, to bridge the demand and supply gap as well as to provide high quality coal for use in various industries the country has no option but to resort to import of coal, especially low-ash coal.

**4.2** As per our Import Policy 1993-94, coal has been put under Open General License (OGL) and therefore consumers are free to import coal based on their requirement. Superior quality non-coking coal is imported mainly by coast-based power plants and other industrial users viz., paper, sponge iron, cements and captive power plants, on consideration of transport logistics, commercial prudence, export entitlements and inadequate availability of such superior coal from indigenous sources.

**4.3** In the year 2020-21 import of raw coal of the country was 214.995 MT (in value 1160372 Million Rupees) against import of 248.537 MT (in value 1527321 Million Rupees) in 2019-20. Thus, in the year 2020-21, import of coal decreased by 13.50% over the previous year. The share of coking and non-coking coal is given in statement 13.

Statement 13: Import of Coal to India in 2020-21		
Type of Coal	Quantity [MT]	Value [Rs. Million]
Coking	51.288	454355
Non-Coking	163.707	706017
<b>Total</b>	<b>214.995</b>	<b>1160372</b>

It can be seen that the share of coking coal in the total quantity was 23.86% which in value terms accounted for 39.16% of the total. Statement 14 shows major source country wise import of coal in India in 2020-21. It can be seen that Indonesia with 43.04% share (92.535 MT) remained the leading supplier of coal to India followed by Australia 25.56% (54.953 MT) and South Africa 14.49% (31.143 MT). These three countries together accounted for 83.09% of the total import to India during the year 2020-21.

Statement 14: Source Country Wise Import of Coal to India during 2020-21		
Country	Quantity [In MT]	Share (%)
Indonesia	92.535	43.04%
Australia	54.953	25.56%
South Africa	31.143	14.49%
USA	12.204	5.67%
Mozambique	3.570	1.66%
Russia	6.749	3.14%
Singapore	4.486	2.09%
Others	9.355	4.35%
<b>Total</b>	<b>214.995</b>	<b>100.00%</b>

**4.4** The break-up of source country wise import for coking and non-coking coal is given in Statement 15 and statement 16 respectively.

Statement 15: Source Country Wise Import of Coking Coal to India during 2020-21		
Country	Quantity [In MT]	Share (%)
Australia	37.036	72.21%
Canada	2.850	5.56%
USA	3.895	7.59%
Mozambique	1.669	3.25%
Indonesia	1.398	2.73%
Singapore	1.860	3.63%
Others	2.580	5.03%
<b>Total</b>	<b>51.288</b>	<b>100.00%</b>

#### Statement 16: Source Country Wise Import of Non-Coking Coal to India during 2020-21

Country	Quantity [In MT]	Share (%)
Indonesia	91.137	55.67%
South Africa	31.854	19.46%
Australia	17.203	10.50%
USA	8.037	4.91%
Russia	5.433	3.32%
Singapore	2.732	1.67%
Others	7.311	4.47%
<b>Total</b>	<b>163.707</b>	<b>55.67%</b>

**4.5** To comprehend the requirement of coal in real term, the planning commission of India has been estimating demand for each year in advance. However, the actual supply (Despatch + Import – Export) has been showing variance from these estimates against the estimated demand of coking coal and non-coking coal. The actual despatch, import and export of coking coal and non-coking coal during the last five years are given in Statement 17 and 18 respectively.

#### Statement 17: Demand\*, Despatch, Import and Export of Coking Coal of India [MT]

Year	Demand*	Despatch	Import	Export
2016-17	56.620	59.308	41.644	0.027
2017-18	63.170	45.380	47.003	0.068
2018-19	58.370	43.318	51.838	0.060
2019-20	70.000	50.656	51.833	0.002
2020-21	77.000	44.001	51.288	0.003

#### Statement 18: Demand\*, Despatch, Import and Export of Non-coking Coal of India [MT]

Year	Demand*	Despatch	Import	Export
2016-17	828.250	586.670	149.309	1.746
2017-18	845.230	644.623	161.245	1.436
2018-19	932.980	689.476	183.510	1.247
2019-20	930.000	565.520	196.704	1.028
2020-21	975.000	646.887	163.707	0.797

\*Source: Annual Plan, MOC

**4.6 Export of Coal:** Although, there was short supply of coal in India compared to its demand and it had to resort to import of coal, India exported some quantity of coal to its neighboring countries during the year 2020-21 (Statement 19). It can be seen from the statement that coal was exported mainly to Nepal 0.618 MT (77.20%) followed by Bangladesh 0.104 MT (13.04%).

Statement 19: Export of Coal by India to Different Countries during 2020-21		
Country	Quantity [MT]	Share (%)
Nepal	0.618	77.25%
Bangladesh PR	0.104	13.00%
Bhutan	0.046	5.75%
Others	0.032	4.00%
<b>Total</b>	<b>0.800</b>	<b>100.00%</b>

**4.7** The break-up of country wise Export for non-coking coal is given in Statement 20. Export of coking coal during 2020-21 was negligible.

Statement 20: Export of Non-Coking Coal from India to Different Countries during 2020-21		
Country	Quantity [MT]	Share (%)
Bangladesh PR	0.104	13.05%
Nepal	0.615	77.16%
Bhutan	0.046	5.77%
Others	0.032	4.02%
<b>Total</b>	<b>0.797</b>	<b>100.00%</b>

## 5. Captive & Commercial Coal & Lignite Blocks

**5.1** The policy of the allotment of Captive Coal Blocks was adopted by the Government of India in the year 1993 and as per this policy by the end of 2013-14, out of total allocated 218 coal blocks, 80 coal blocks were de-allocated. Thus, at the end of 2013-14, 138 coal blocks and 28 lignite blocks remained allocated under the category of Captive Coal Block. During the year 2014-15 by virtue of judgment dated 25.08.2014 read with the order

dated 24.09.2014 of the Hon'ble Supreme Court of India, out of 218 captive coal blocks, allocation of 204 coal blocks were cancelled except allocation of 12 coal blocks for UMPPs and one coal block each allocated to NTPC and SAIL.

**5.2** Further, allocation of four coal blocks for UMPPs, namely, Chhatrasal coal block cancelled on 07.05.2015 and Meenakshi, Meenakshi B and Dip side of Meenakshi blocks of UMPP cancelled on 15.12.2015. As such as on date 10 coal blocks allocated through earlier dispensations stand allocated.

**5.3** Subsequent to the order of the Hon'ble Supreme Court of India, 42 nos. of producing coal blocks [Schedule II coal mines as per the Coal Mines (Special Provisions) Ordinance, 2014 replaced by the Coal Mines (Special Provision) Act, 2015] were allowed to produce coal up to 31.03.2015. Thus, total number of blocks stand allocated from 25.09.2014 to 31.03.2015 was 52 [42 + 10 earlier coal blocks]

**5.4** In 2017-18 CMDPA of 5 captive coal blocks have been terminated.

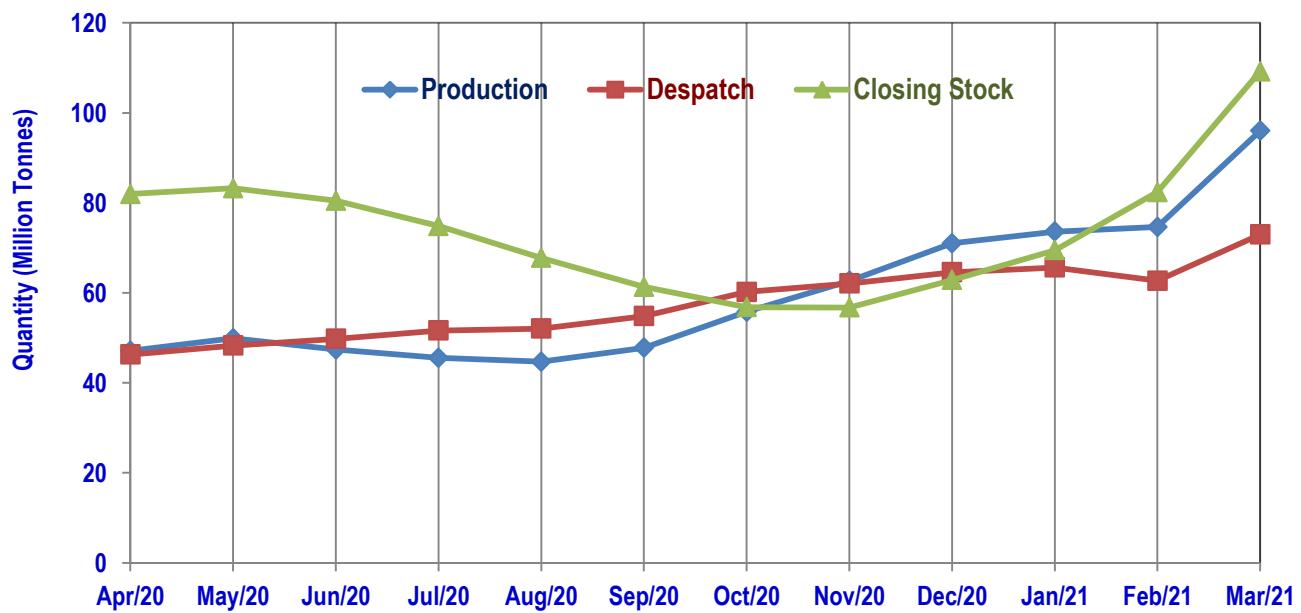

**5.5** Under the "Auction by Competitive Bidding Rules, 2012", 11 regionally explored coal blocks have been allotted to Central/State Government companies.

**5.6** Up to 2020-21, 130 Captive Coal Blocks vested/ allotted including 3 blocks under Not Cancelled by Hon'ble Supreme Court & 4 Coal Blocks under Custodian. From these total 130 coal blocks production of coal was 66.346 MT in 2020-21.

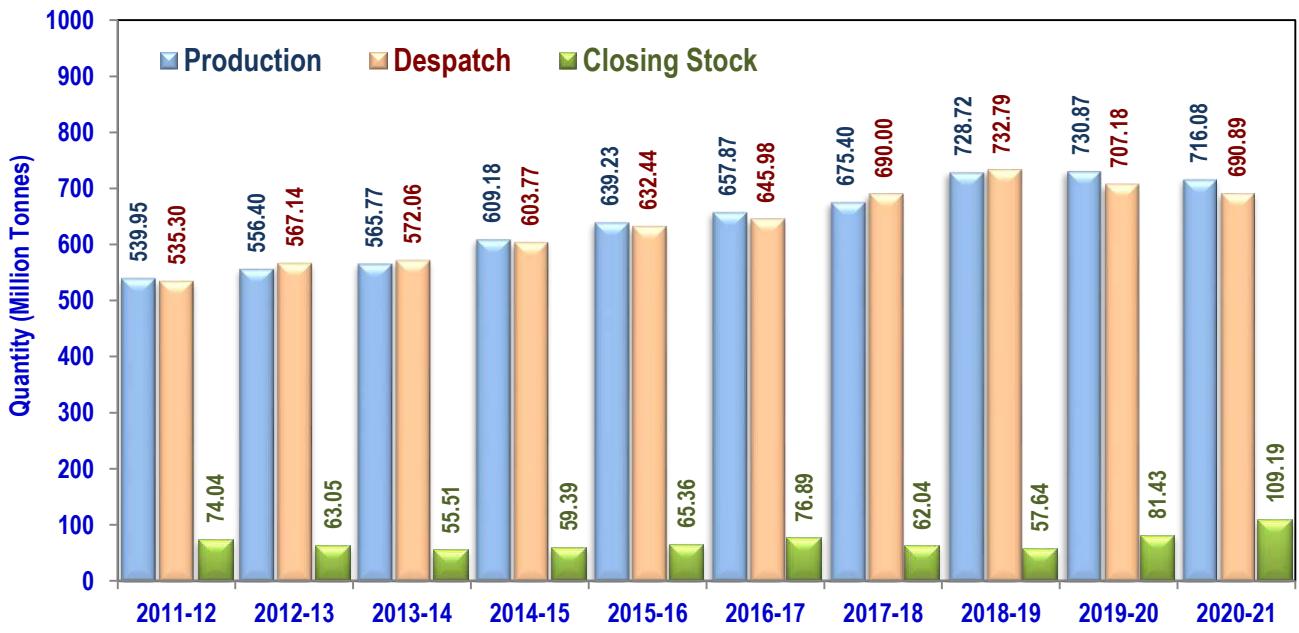

**5.7** Therefore, as on 31.03.2021, number of coal blocks that exist are 130 (vested/ allotted - 108 + Custodian -04 + Under MMDR Act – 15 and blocks not cancelled – 03).

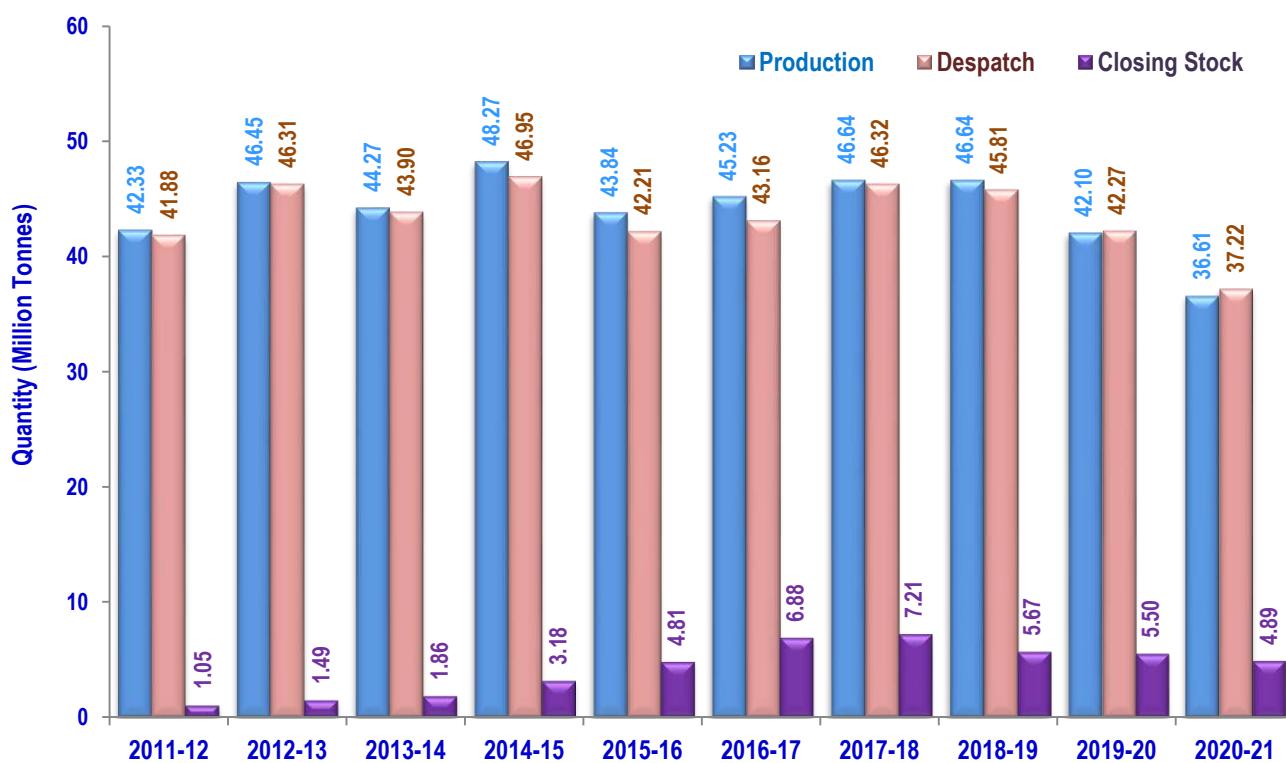

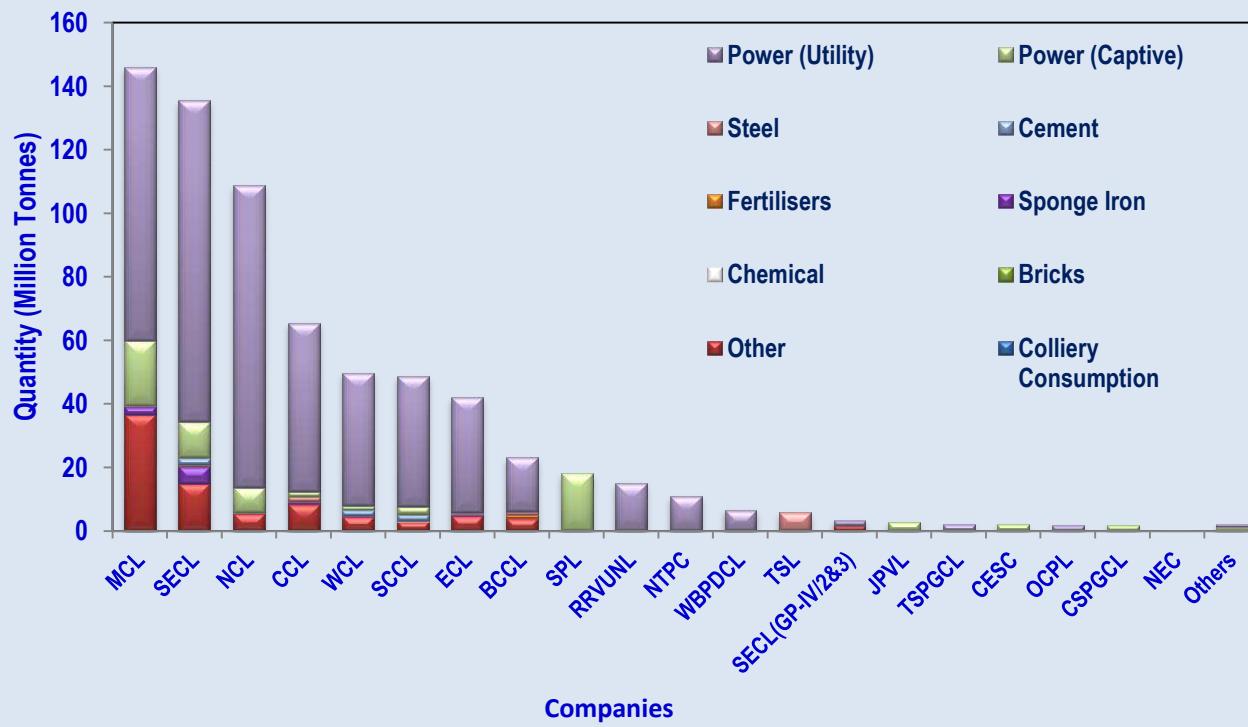

**5.8** As on 31.03.2021, the number of lignite blocks that stand allocated are 23.

**Chart - I: Month Wise Raw Coal Production, Despatch & Closing Stock in 2020-21**

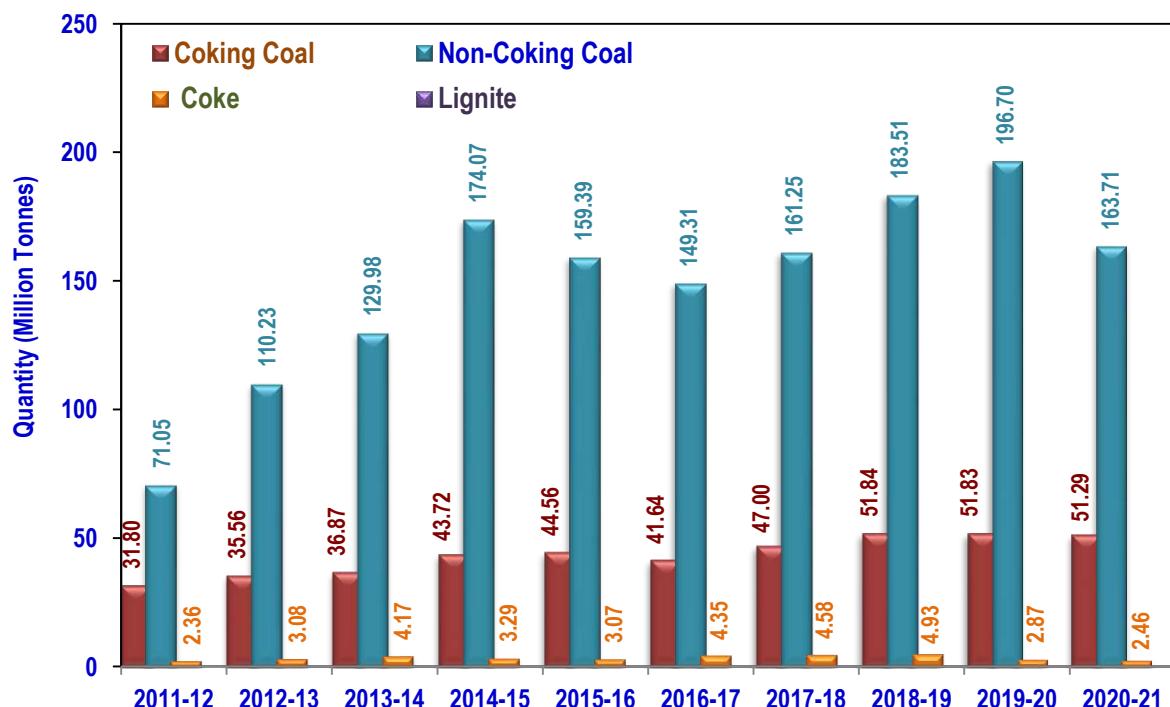

**Chart - II: Raw Coal Production, Despatch & Closing Stock during Last Ten Years**

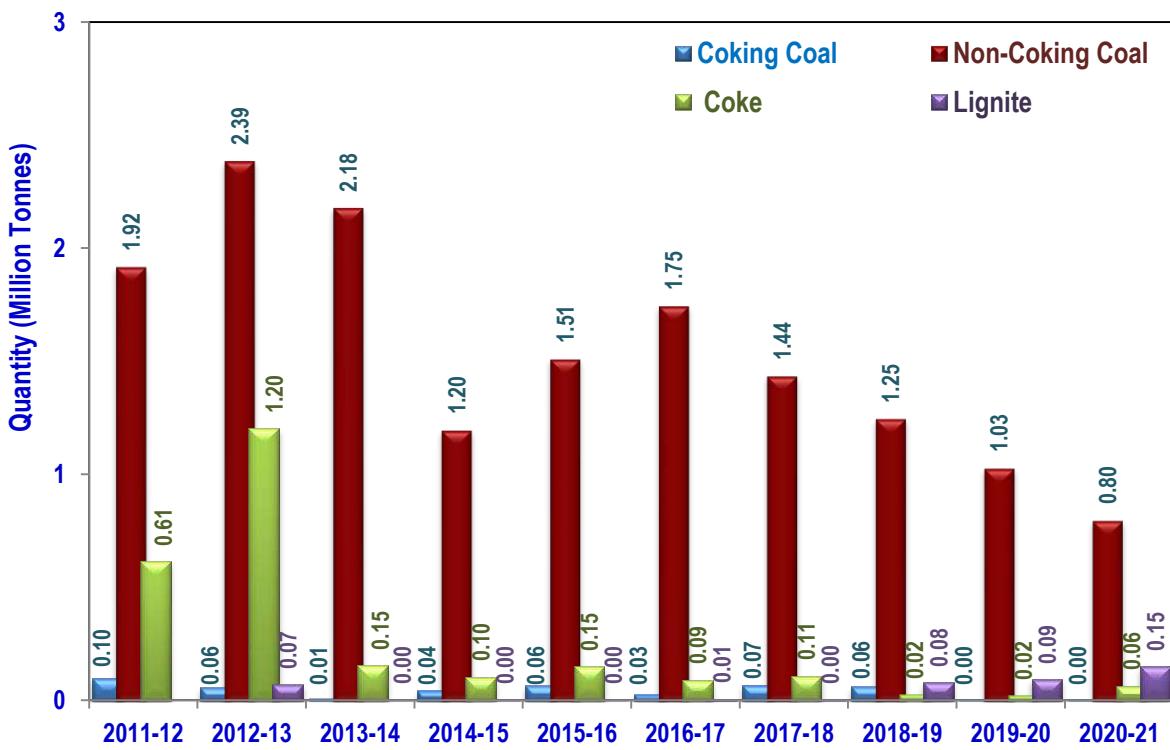

**Chart - III: Lignite Production, Despatch & Closing Stock during Last Ten Years****Chart - IV: Sector Wise Despatch of Raw Coal from Different Companies in 2020-21**

**Chart - V: Import of Coal (Coking and Non-Coking), Coke and Lignite during Last Ten Years**

**Chart - VI: Export of Coal (Coking and Non-Coking), Coke and Lignite during Last Ten Years**

## Demand, Supply, Resources & Exploration

**Table 1.1: All India Coal Demand (BE) and Supply - Sector Wise : 2020-21**  
 (Quantity in Million Tonnes)

Sector	Demand ( BE )	Actual Supply			Achievement
		Indigenous	Import	Total	
<b>I. Coking Coal</b>					
1 Steel/Coke Oven/Private Cokeries	77.00	8.94	51.29	<b>60.23</b>	
2 Import					
<b>Sub Total (Raw Coal)</b>	<b>77.00</b>	<b>8.94</b>	<b>51.29</b>	<b>60.23</b>	78.22%
<b>II. Non Coking Coal</b>					
3 Power (Utilities)	707.00	475.93		<b>475.93</b>

Note: 1. Growth (%) is calculated over similar period of last year.

2. Share (%) is calculated as ratio of month to yearly production.

3. The above figures are related to Washeries (public &amp; private) of only coal producing companies.

4. Private washeries (only washeries, having no coal blocks) are not included here.

5. Hard Coke data is related to steel plants only.

- Note:
1. The above figures are related to Washeries (public & private) of only coal producing companies.
  2. Data of Hard Coke is related to steel plants only. There are private sector companies, specially in small scale sector, data of which are not readily available.

**Table 3.4: Monthly Despatch of Different Type of Raw Coal and Lignite during 2020-21**

(Quantity in Million Tonnes)

Month	Coking Coal			Non-Coking Coal			Total Raw Coal			Lignite

Note: 1. Growth is calculated over last quarter year, as the case may be, and is expressed in percentage.

2. Share is calculated as ratio of month to yearly despatches and is expressed in percentage.

3. The above figures are related to Washeries (public &amp; private) of only coal producing companies.

4. Data of Hard Coke is related to steel plants only. There are other private sector companies, specially in small scale sector, data of which is not readily available.
