Technical changes done to make blocks attractive

- There are 49 revised coal blocks in this 6th/16th tranche of auction formed from 29 coal blocks put under earlier auction
- Revision has been done considering mainly the following:
 - Splitting of larger blocks considering geological structures, surface features, etc.;
 - Exclusion of highly geologically disturbed areas;
 - Exclusion of densely populated areas particularly close to the boundary;
 - Exclusion of dense forest areas from the block area;
 - Exclusion of existing highways, railway lines, etc., wherever possible;
